**RE: Acknowledgement of Exceptional Performance**

Dear Mr. Barten,

As we approach the pending turnaround I am very pleased with the progress of the LSM electrical and instrumentation scopes. The high percent completion of the I/E scope, relative to the mechanical trades, is something MEADE Electric can take pride in. My hat goes off to you for your outstanding leadership, and to your crew for all the hard work, innovation and forward thinking. I am confident the level of preparedness will pay dividends as we execute the remaining work scope.

Looking forward to a SAFE and successful turnaround!

Regards,

Donald P. Bushby  
Senior Electrical Engineer  
ExxonMobil Joliet Refinery
